

Statement about the COVID 19 vaccination.

CASBA supports people with a Learning Disability to self-advocate.

We think everyone has the right to easy read or accessible information.

This will make it easier for people to understand what the COVID 19 vaccination is and make their own decisions.

If you are unsure about having the vaccination, we think you should talk to a medical professional, like your doctor.

CASBA staff and volunteers can support the people we work with to understand the facts about this vaccination.

Rob Legge
Acting Executive Manager
